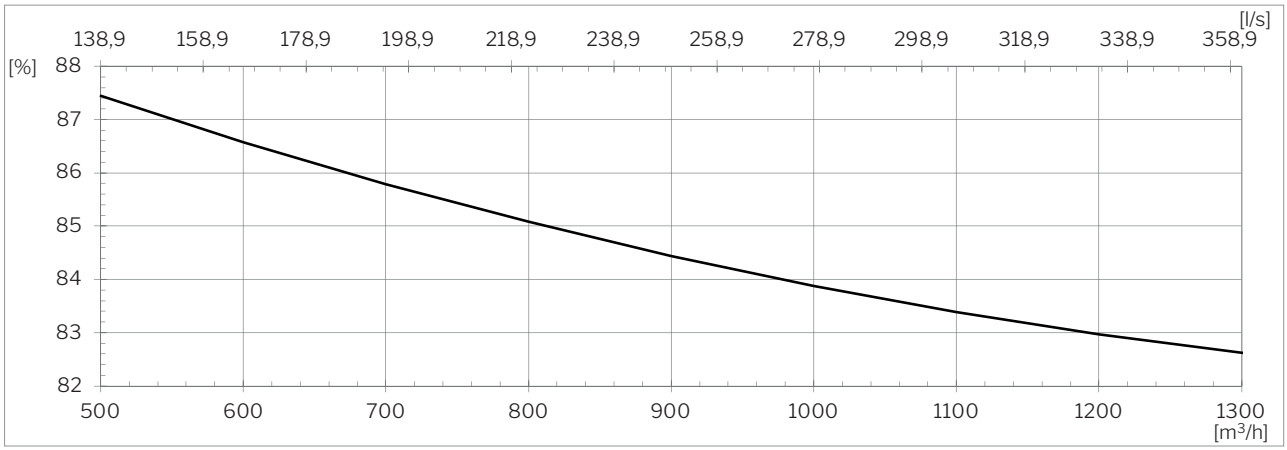
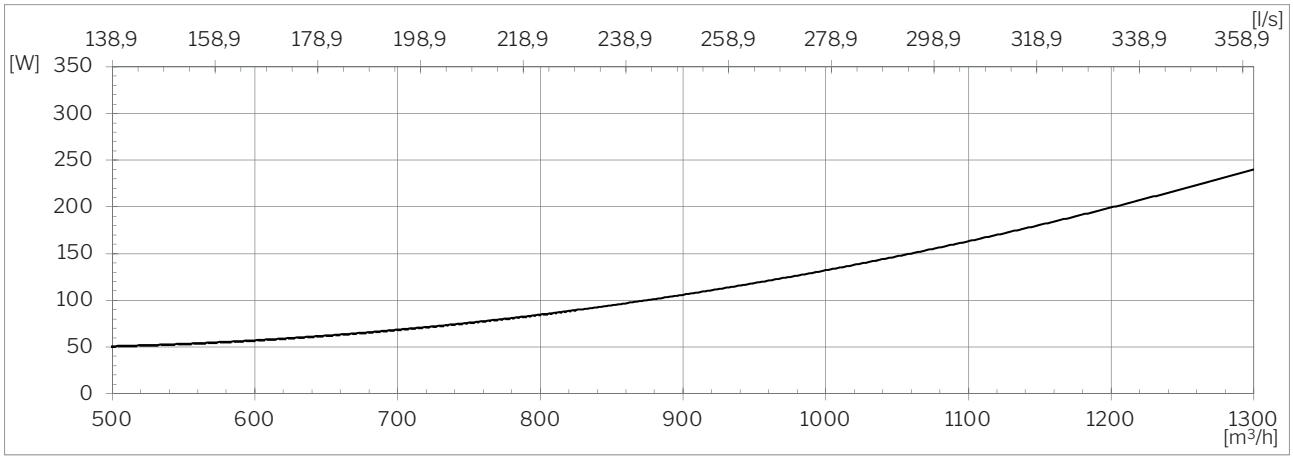
Temperature efficiency acc. EN 308



Balanced airflow; Extraction: 25 °C, 28 % RH; Supply: 5 °C.

Power consumption [7]



ePM_{10} 50% / ePM_{10} 50%

[6] Sound pressure level $L_{pA,eq}$ is measured in a height of 1.2 m with at horizontal distance of 1 m from the air handling unit in room with a size of 200 m³ and a reverberation time of T = 0.6 s, corresponding to a room attenuation of 7.5 dB.

[7] All measurements were performed in normal operating mode in a standard installation using the facade grills Ø400 recommended by Airmaster.

The AM 1200 unit spreads an air stream in different directions, depending on the given airflow.
This can be seen in the illustration, in which the blue shading indicates throw length the different airflows.

[1] Throw length seen from above.
